Janelle Stalder : Underground (New World Series Book 4) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Underground (New World Series Book 4):

And these two spitfires really shouldnrsto;t be left alone ;) or should they, actually, yes they should, always cause *fans self*I thought for sure that my favorite couple would never change from Tyler and Missy because well Scott, and Missy is like my type of girl, the silent strength kind, but these two omg. i loved the heat, the fire between them. The chemistry was hotter than heck.The story will have you on the edge of your seat, shaking with anticipationThings might finally be looking up for the crew, until they donrsquo;t you will have to read to get the specifics, but here is what i will tell you. As always Janelle creates a brilliant new story for us to lose ourselves in, the couples that form in this book, and the beginnings of others will make you BEG for the next book i know i am preparing ;)but seriously is it a thing to sit outside an authorrsquo;s house and just watch them write the book? can i do that? i will do it. Donrsquo;t doubt me..So obviously i enjoyed the book. I really think this was perfectly paced, left readers wanting more at the right exact moments. The book was fantastic, i really cant say more than that. If you have come this far into this series you know its worth every word.New alliances, new sort of enemies, new developments! It will definitely keep you tight in its grip until you donrsquo;t even realize you accidentally glance over to the next page and see the dreaded words: ldquo;THE ENDRdquo; *not like that happened to anyone or anythinghellip;. :| hellip;..I cannot wait for the next book in the series, especially that little novella that is suppose to be coming out very berry spoon too because neeeeddd and my hope is to see a little more extended from this one? maybe? god i need ithellip;. okay and that concludes this review.wait no.Read this series you wonrsquo;t regret a moment of it0 of 0 people found the following review helpful. Great additionBy Monca27Wonderful addition to the New World Series!0 of 0 people found the following review helpful. I love this series.By Heather T.Underground had everything from suspense to love and mystery. It was a fun read and I can't wait for the next book in this series.

Praise for Underground:"This book is Imaginative and innovative, page turning excitement. Its a fan favorite of mine and can be compared to Divergent with spice for the new adult crowd that will leave you wanting more." - Terri. E. Laine, Author of Cruel and Beautiful"Underground was without a doubt one of the best books I have ever read. I

cannot wait for the next book... and the next... and the next. This is without a doubt one series nobody should miss out on. Underground gave me chills and took my breath away. Absolutely stunning!" - Kayleigh Gore, K-Books BlogLove isn't something you find. Love is something that finds you. Phoenix has spent her whole life fighting. All she's ever wanted was to return the world to a peaceful state, and bring down the New World Order. But now she finds herself in a different sort of battle. No longer set in the streets of New Berlin, the fighting has moved beneath them, in a vicious underground fighting ring run by outlaws bent on causing trouble. And if that isn't hard enough, she's stuck with the one person who loves to fight more than she does - Trent McKay. Now the race is on to get out of their new prison and back home - before they end up killing each other. Or worse - fall in love.***This book is for mature audiences due to strong language, violence, and sexual situations. New World SeriesSwitchMaskedTestedUndergroundSilence
